But the German army is merely frustrated, not defeated. The issues involved in this great battle seem to require a decisive battle. The German army is a magnificent organizations, is determined and is brave. Upon its own territory the German army may present an entirely different kind of fighting from that which it has shown on the offensive in the approach to Paris. The battle toward which ward wereing may therefore be the most required and the mast membrane and the markable and the most momentous well.

Haggin raised the largest crop of whom shown on the offensive in the approach to Paris. The battle toward were greatly honored that the venture is proving very profitable for the proving in the whole history of the world.

It is now likely that the Germans ultimately will suffer defeat, and those who knew the rea! heart and soul of the German people will regret that a mad emperor has rushed into a war of such bloody consequences, of such sorrow laden conflicts. The great issue to be settled in this war yet may be not which nation shall be considered superior, but what shall be the fate of the dynasties?

Is this war the making of the peo-Will the powers which may triumph be as cruel in their demands and exactions as were the instigators of a war whose sole purpose seems to have been covetousness and the seeking of territorial accessions?

A mere cessation of the fighting, without the settlement of the various vital questions involved and that have been brought about since the beginning of this collosal war would not mean lasting peace. A truce for the replenishment of arms, for the recruiting of fainting battalions, would only mean a prolongation of a struggle which is dealing death and sorrow as generously as the sower casts his grain.

What the world needs is a deep and abiding peace. A peace that will spread contentment all over Europe and assure each nation or each republic that there is no effort being made to deprive it if its logical and absolute standing among the other govern-ments of the world.

THE LESSON OF HAGGIN'S LIFE.

James B. Haggin, who died last week, became in his life time the owner of the greatest race horses in the world. To name Salvator, Longtreet and Hamburg alone is to couple his name with the smartest pages in the history of the turi. The romantic career of this man points to but one

.The mayor of Anderson recently undertook to keep beggars out of the city. The charitable organiations at work here and the county home can take care of the poor and needy and no one will be allowed to suffer here. There are too many professional beggars, and these will not conform themselves to the rules of regulated charities.

There is a tendency in the south to permit too many vagrants, particularly among the negroes. If the police make an arrest, some soft hearted man may get a trifling negro off the chaingang. The negro loafer knows how to wheedle the white man. With
